

SUMMARY

Originally from London, I am a private banker and portfolio manager advising founders, executives, and private equity professionals on capital allocation and balance-sheet optimization. My experience spans discretionary portfolio management across public and private markets, alternative fund due diligence, concentrated-position management, custom debt financing, and corporate finance modeling. Concurrently, I build live software tools (Claude Code, Codex, Airtable, React) to upgrade investment analysis, research workflows, and decision-making.

PROFESSIONAL EXPERIENCE

J.P. Morgan Private Bank

Senior Associate, Private Banker

Los Angeles & Denver
May 2022 — Present

- Advise UHNW clients across a \$1B+ book — founders, private business owners, PE principals, professional athletes, and entertainers; primary relationship manager for ~30% of the book.
- Moderate the AWM Morning Meeting, a division-wide forum of 800+ advisors, presenting macroeconomic developments, market risks, and technology-driven investment themes.
- Develop portfolio and balance-sheet recommendations across liquidity events, concentrated positions, borrowing, and long-term allocation; build capital-allocation and liquidity-event models that translate client-specific tax, liquidity, and market assumptions into clear planning scenarios.
- Diligence alternative investments pre-recommendation across manager strategy, fund structure, liquidity terms, drawdown mechanics, portfolio fit, and underlying exposure; advise on concentrated-position diversification via direct sales, borrowing, and structured solutions.
- Designed internal tools and automated workflows for investment research, meeting preparation, and client communication; presented the systems to Asset & Wealth Management senior leadership.

BOK Financial

Private Wealth Portfolio Manager

Denver, CO
Aug 2020 — May 2022

- Managed \$366M in client assets across equities, fixed income, and alternatives — translating client objectives, tax constraints, and risk tolerance into portfolio construction, trading, and rebalancing decisions.
- Authored fundamental equity research backed by proprietary cash-flow models, including an early-2021 Nvidia thesis ahead of the AI-driven semiconductor cycle and coverage of interactive entertainment names (Ubisoft) on business quality, industry structure, and long-term growth drivers.
- Built an interactive Power BI dashboard for block-trade reporting, giving senior leadership clearer visibility into trading activity and portfolio-level decisions.

Verizon Communications

Wireline Commercial Finance Team

Finance Leadership Development Intern
Jun 2018 — Aug 2018

- Developed an integrated cost, pricing, and penetration model using advanced data analytics to forecast FiOS penetration rates; presented the model and strategy recommendations to Verizon's CFO and senior leadership.

SELECTED AI & ANALYTICAL BUILDS

- Rapid Prototyping & Internal Tooling** — Live React/HTML/JSEX applications built with Claude Code, Codex, Cursor, and Lovable, translating investment-analysis and advisory workflows into functional software (full breakdown in the Artifact Catalog).
- Pre-Transaction & Concentrated Position Models** — Liquidity-event models covering tax waterfalls, lifestyle runway, reinvestment scenarios, and borrowing capacity; concentrated-position comparisons across direct sales, borrowing, hedging, and structured solutions.
- Variable Prepaid Forward Models** — VPF models for clients and prospects with concentrated equity positions, incorporating J.P. Morgan long-term capital market assumptions and client-specific liquidity needs.
- Research & Synthesis Operating Systems** — Workflows for investment research, meeting preparation, client emails, follow-up notes, output review, and voice-to-draft conversion.

EDUCATION

University of Tulsa — BS Finance; Minors in Economics and Law

Aug 2016 — May 2020
